

Anaphylaxis in a pregnant patient in the L&D suite

Interdisciplinary Team Simulation - Date: _____

Nursing Anes OB Other

Each item has two components. "Before the simulation" column (left side) examines your perspective at the start and "End of Simulation" column (right side) examines your perspective after completion of the simulation. Think carefully about your responses and answer accordingly.

1 How would you rate your ability to recognize signs and symptoms of anaphylaxis in a pregnant patient?

BEFORE THE SIMULATION							END OF SIMULATION									
1	2	3	4	5	6	7	1	2	3	4	5	6	7			
Little/no ability							Very accomplished			Little/no ability			Very accomplished			

2. How would you rate your ability as a team member to formulate/execute a plan to manage anaphylaxis in a pregnant patient?

BEFORE THE SIMULATION							END OF SIMULATION									
1	2	3	4	5	6	7	1	2	3	4	5	6	7			
Little/no ability							Very accomplished			Little/no ability			Very accomplished			

3. How would you rate your ability to determine the dose and route of administration of epinephrine in a pregnant patient with anaphylaxis?

BEFORE THE SIMULATION							END OF SIMULATION									
1	2	3	4	5	6	7	1	2	3	4	5	6	7			
Little/no ability							Full ability			Little/no ability			Full ability			

4. How would you rate your ability to access medication and equipment to manage such a patient in the labor and delivery unit?

BEFORE THE SIMULATION							END OF SIMULATION									
1	2	3	4	5	6	7	1	2	3	4	5	6	7			
Little/no ability							Very accomplished			Little/no ability			Very accomplished			

5. How would you rate your ability to use closed loop communication and SBAR with team members during an obstetric emergency?

BEFORE THE SIMULATION							END OF SIMULATION									
1	2	3	4	5	6	7	1	2	3	4	5	6	7			
Little/no ability							Very accomplished			Little/no ability			Very accomplished			

Any additional comments/insights on what you have/have not learnt:
