

Obstetrics Interdisciplinary Team Simulation: Magnesium Toxicity

Date: _____

OB Nursing Anes Peds

Each item has two components. The “Before the simulation” column (left side) examines your perspective at the beginning of the simulation. The “End of Simulation” column (right side) is meant to evaluate your perspective at the completion of the simulation. Think carefully about your responses and mark them accordingly.

1. How would you rate your ability to recognize magnesium toxicity in pregnancy?

BEFORE THE SIMULATION							END OF SIMULATION						
1	2	3	4	5	6	7	1	2	3	4	5	6	7
Little/no ability							Fully able						

2. How would you rate your ability to manage magnesium toxicity in the pregnant patient?

BEFORE THE SIMULATION							END OF SIMULATION						
1	2	3	4	5	6	7	1	2	3	4	5	6	7
Little/no ability							Fully able						

3. How would you rate your ability to manage an obtunded obstetric patient?

BEFORE THE SIMULATION							END OF SIMULATION						
1	2	3	4	5	6	7	1	2	3	4	5	6	7
Little/no ability							Full able						

4. How would you rate your ability to access emergency resuscitation equipment and drugs from the Labor and Delivery suite, during an obstetric crisis?

BEFORE THE SIMULATION							END OF SIMULATION						
1	2	3	4	5	6	7	1	2	3	4	5	6	7
Little/no ability							Fully able						

5. How would you rate your ability to effectively communicate with team members when managing an obstetric crisis?

BEFORE THE SIMULATION							END OF SIMULATION						
1	2	3	4	5	6	7	1	2	3	4	5	6	7
Little/no ability							Full able
